

+ summary

From the fast paced restaurant industry to building my father's business to a salable asset, I have now turned my energy and determination to tech. I help companies show their best selves to the world with creative websites and apps. I have a passion for language and fitness and helping others become their best selves.

+ skills

Notary Public, State of Georgia, Conflict Resolution, Time Management, Decision Making, Training/Communication

+ employment

General Assembly

Software Engineering Immersive | Engineering Fellow

July 2020 to Oct. 2020

General Assembly's Web Development Immersive is a 12 week long training program dedicated to prepare students to think like engineers and approach problems creatively in order to build the next generation of web applications and digital products.

Working as an individual and with teams, I thrived in the fast paced of learning multiple languages and building projects quickly.

Jerry Lobin Process Service Inc

Operations Manager/Process Server

Atlanta, GA

Mar. 2005 to May 2020

I helped build my parents' dual proprietorship into a major force in the Process Serving industry in Atlanta. As Operations Manager I monitored employee and subcontractor productivity through data analysis. I managed logistics of moving thousands of legal documents from clients to courthouses to subcontractors to proper legal service on individuals, businesses, and government offices. While building great relationships with clients and courthouse employees, I also oversaw the business web presence and maintained the company database and server system in MS Access.

As a Process Server I grew an understanding of Georgia law and practice pertaining to the service of civil process and debt collections. I served civil suits and garnishments, explaining legal concepts to laypersons succinctly while being empathetic to their unique situations. I trained employees and other Process Servers in the communication and de-escalation skills that are pertinent in this industry. I practiced mediation and compromise between employees, clients, court officials, defendants, and garnishee representatives.

+ projects

bilingüe

A full CRUD Django/Python app for maintaining Spanish language skills, designed with pure CSS.

Psychedelic Roulette

A vibrant, digital update to a centuries old table game built in HTML, pure CSS, and Javascript.

Meet Your Maker

A full CRUD MERN app connecting urban farmers and makers with local buyers. A group project that utilizes AWS-SDK and Semantic UI for React.

wodWizard

A full CRUD Express NodeJS app for daily workouts and workout tracking.

+ education

General Assembly

Software Engineering Immersive

Certificate of Completion

July 2020 to Oct. 2020

Georgia State University

BA Spanish for International Business

activities +

Rowing Instruction and Volunteering · Atlanta Rowing Club

June 2013 to Current

As a member of the Atlanta Rowing Club, I volunteer in timing at the second largest regatta in the U.S. working with referees, regatta officials, and third party timing software companies. I coach new rowers in Learn to Row classes as well as coaching and training teammates for regattas. Being part of two different competitive teams emboldened my ability to take and give constructive criticism. I also give seminars on indoor rowing at local CrossFit gyms. I have competed in Masters competitions in the US and Canada, including the Canadian Henley and the Worlds Masters Regatta.
